Crown Infrastructure Delivery

OUR SERVICES

Advisory and Strategic Advice

Infrastructure is complex, and it starts with the right early decisions.

We bring practical delivery experience to the earliest decisions.

CID helps central and local government **shape business cases and plan investments** that align with government and community priorities. So the case you take to Cabinet, your council or your board is realistic, well tested and ready to deliver.

You choose the level of support you need and only pay for what you use, with a focus on advice that is independent and evidence based.

PROJECT NAME
Biodiversity storage facility review

HOW WE HELP

- Indicative and detailed business case development
- Investment and options analysis
- Independent review and assurance of business cases
- Programme and investment planning across the lifecycle
- Feasibility studies and early scoping
- Governance and independent advisory representation

WHY CID FOR ADVICE

- **Independent and trusted** – Crown owned, working for the public good rather than a profit
- **Grounded in delivery** – advice shaped by people who have delivered complex projects
- **Capability and capacity** – specialist help when your own team is stretched
- **We strengthen you** – we build your team's capability rather than taking over

CID IN ACTION

- **Ministry of Social Development**
  Business case development for High and Complex Needs framework infrastructure.
- **Feasibility studies**
  Early scoping for Porirua City Council, Lyttelton Port Company, Queenstown Airport Company and Police.
- **Chatham Islands Council**
  Contracting and professional services procurement for roading, water, wastewater and solid waste infrastructure.
- **Ministry for Culture and Heritage**
  Independent review of the proposed Te Papa biodiversity storage facility.
- **Ministry of Justice**
  Independent cost and value-for-money review of significant Crown infrastructure projects.

Some work is commercially sensitive. Ask us and we will talk you through what we can.

First advice to finished asset
Advice can stand alone, or flow into embedded support and full delivery as the project grows.

Advice you can act on
Because we deliver as well as advise, our advice is tested against what it really takes to build.

Right, on time, fair price
Our focus stays on getting your project right, on time and at a fair price.
